

Britain's Automobile King Gave Millions In Making Philanthropic History

England has awakened to the fact that it is a real Santa Claus, who works at his benevolent trade the year round, and all England is excited about it. Because it is almost a first-time experience for the little island—this money-giving tale of the man who was reared as plain Bill Morris—and was made by his King a member of the peerage under the title of first Baron Nuffield.

For years Lord Nuffield, Britain's most authentic automobile king, has been giving away sums ranging from \$100,000 to \$500,000 to various hospitals and medical research funds. It is a sort of tribute he pays to his boyhood dream. He wanted to be a surgeon. Poverty and fate decreed otherwise. But these gifts were mere fleas to what he was preparing to do. He has made philanthropic history for Britain in recent months. He donated to Oxford University the sum of \$5,000,000 for founding of a great institution for medical research. In November he was present at what is called a "convocation" of the university. He sat on the platform with the learned big wigs. Suddenly Lord Nuffield rose and electrified his hearers. He said he had been told that a great medical research institution, such as he had in mind, would need at least ten million dollars. Therefore, he proposed to raise his own ante from \$5,000,000 to \$10,000,000.

While the English public still was dazzled by this, Lord Nuffield came to bat again. He announced he would give a fund of \$10,000,000 to help the depressed areas in South Wales. He said he did it to give practical shape to the current expression of good will towards the new King George Sixth, to do anything he could in support of the National Government and to express his admiration for Premier Baldwin.

Next, he turned over a block of stock in his company, worth over ten million dollars, for the benefit of the 15,000 workers in his nine plants at Oxford, Coventry and Birmingham. He said he wanted them to be shareholders in the concern and enjoy dividends too. His scheme is to keep the block of stock intact, but every year to divide the dividends among the workers.

William Richard Morris was born at Cowley near Oxford in 1877, his parents being poor folk. As a youth of 18 he started working as an apprentice in a shop in Oxford where bicycles were sold and repaired. His accumulated savings, after a year, were just \$25. With this he started a bicycle repair shop of his own in an obscure side street of Oxford. It was not long before he was building bicycles. Moreover, he became a racing cyclist to advertise his own wares and won seven championships in the counties of Oxfordshire, Buckinghamshire and Berkshire. He kept a step ahead of others when he foresaw a coming boom in motorcycles, so he began making them and prospered.

Next he conceived and built a cheap little motor car, sold 400 his very first year. The war intervened and he turned to making munitions. At the war's end, he had to begin all over again, as his trained personnel was scattered and his machinery either worn out or changed. When depression hit the motor business and other English manufacturers sought to hold down production by raising the price of their cars, he built a popular car and cut his prices. His cars were furnished like the proverbial green bay tree. Soon he bought out a number of others and consolidated their plants with his.

Even with all the money he has given away, he is worth \$100,000,000 taking into consideration only the market value of the stock he holds in his concern. Unlike other millionaires who have been ennobled, he is still holding on to his money to found a new dynasty in the peerage. He has no son to whom the peerage will fall.

This childlessness is the one big sorrow in the lives of Lord Nuffield and his wife. They are one of the most devoted couples in England and she is the least publicized woman. Photos of her are unknown. When he was plain Bill Morris, she was Elizabeth Maud Anstey, young school teacher, whose father was an Oxford furrier. They wed 32 years ago. To-day, with everything money can buy, Lord Nuffield's three hobbies are his home, his work and his golf.

He still retains his plain little office, while some of his directors have palatial ones.

Was Clever Botanist

John Grimshaw Wilkinson, 81, blind botanist who told flowers by touching them with the tip of his tongue, trees by the sound of raindrops on their leaves, is dead at Leeds, England. Wilkinson lost his sight when he was 23. He developed his other senses so highly that he greatly minimized his handicap and was able to pursue his scientific work.

The Theobroma cacao, a small evergreen tree native to tropical America, yields the large nutmegs from which chocolate and cocoa are made.

The More We Are Together

Tourist Industry Between Canada and U.S. Can Forge New Instrument of Peace

Development of the tourist industry between the United States and Canada can forge a new instrument of peace between these two countries, D. Leo Dolan, director of the Canadian Travel Bureau, told the Washington Canadian Club.

"I believe we can be better friends and better neighbors the more we mingle with one another, the more we learn to appreciate the aims and hopes and ambitions of our respective countries," he said.

He declared Canadians and Americans had given an "unmistakable answer to a doubting world" that two great nations, bearing a different allegiance, may live side by side in peace and harmony, in concord and good-will.

"We have shown the world that we Anglo-Saxon people of this North American continent have cast aside, in the settlement of our international affairs, the barbarism of force and have resorted to the civilization of reason," he said.

Mr. Dolan stressed the great need of reciprocity of travel between the United States and Canada. "I do that for two reasons," he said.

One, because I know an increased travel between these two countries will be beneficial from an economic standpoint; secondly, we Canadians travel very extensively in the United States, and last year, it is estimated that the nationals of my country expended in your country approximately \$80,000,000.

"In other words," he continued, "the per capita expenditure of Canadian travellers in the United States was far greater than the per capita expenditure of United States citizens within Canada. Yet the Canadian tourist industry in 1936 had a monetary value of from \$260,000,000 to \$275,000,000.

"There is another factor, too, which encourages me to urge an ever-increasing tourist traffic between the United States and Canada," Mr. Dolan continued. "International movements in the world today are being offset by intense nationalism and as such are full of danger. Ignorance, and ill-will, born of ignorance, will be upon us unless we keep wide open the gates of understanding and knowledge of each other."

Radium in Canada

Very Limited Quantity Can Be Refined Every Month

Radium is now being produced in Canada on a regular production schedule. After years of research and chemical processing the Eldorado Refinery at Port Hope, Ont., have so perfected their extraction methods that they are able to refine monthly an infinitesimal quantity. Pitchblende radium-bearing ore, mined on the fringe of the Arctic Circle at Eldorado Gold Mines on the shores of Great Bear Lake, is shipped in special bags 3,000 miles to the refinery where six tons of chemicals are required to refine one ton of ore, from which is extracted but a few milligrams of radium salts. Previous to the discovery of radium in Canada's great northwest the price of radium was \$70,000 per gram. Canadian enterprise has now reduced this to around \$30,000.

Fresh radium salts are sealed in a match glass tube no thicker than a needle and are kept in holes drilled into a safe made from solid lead. The rays from radium continue for nearly 1,700 years and its most humanitarian use is in the treatment and cure of cancer.

Has Started Again

Chain-Letter Writer Asks For Tea Towels Now

The fugitives from a chain-letter gang are at it again, this time not with dimes but with dishcloths. Brooklyn is the seat of the new chain-letter iniquity, and it is strictly for women. No men are wanted unless they happen to have a yen for tea towels.

The system is the same as it was two years ago when everyone was writing everyone else urging them to send dimes to perfect strangers and to "break the chain." The only difference is that the recipients are asked to send towels instead of coins.

It works in three. Recipients of a towel letter are asked to send a tea towel to the person whose name heads a list of three names. The three recipients of a towel letter carry on the chain to nine and finally the chain goes to 27, so that the original sender of three letters gets 27 tea towels, if all goes well.

The good women of Brooklyn report the idea is working well and that dishcloths are arriving in abundance.

Old Pottery Found

Pottery and hieroglyphics have been recently discovered in the mining country east of Lake Winnipeg in the province of Manitoba. The presence of a race there 20,000 years ago that may have been related to the Egyptians.

If not redeemed, jewels taken from smugglers are sold at public auction at the port where they were seized.

The world's largest consumer of sugar is the United States.

Discloses Forgeries

New Process Will Quickly Restore Obliterated Ink Writing

A new, quick and simple process for restoring obliterated ink writing was announced in Chicago by Northwestern University's scientific crime detection laboratory.

It was developed by Mr. Edwin O'Neill, instructor in police science, for use in disclosing forgeries in wills, contracts and other documents. The apparatus is so simple it can be carried in the pockets of law enforcement agents and employed with dramatic effect before judges and juries.

It consists of a gooch funnel—a tube-shaped glass six inches long. The opening on the large end is the size of a quarter. The other tapers off into a stem and mouth piece. The middle section of the instrument is packed successively with wads of glass wool, potassium sulphate and cotton moistened with hydrochloric acid.

O'Neill blows through the stem on the portion of the document suspected of having been altered by erasure or chemicals.

"If iron is in the ink of the erased portion," the announcement said, "it will react with the sulphuric acid vapor and emerge immediately into view."

Nearly all the blue-black and black inks commonly used to-day contain iron. When these inks are removed the invisible iron residues in the paper are not affected so that the original writing in many instances can be restored.

Seahorse Is Talkative

Expert Believes They Can Communicate With One Another

A U.S. government expert, learned in the lore of the ocean deep, vowed that he had overheard fishes talking to each other.

After an exhaustive study of the life of the hippocampus, a mysterious creature popularly called the seahorse, Isaac Ginsburg of the U.S. bureau of fisheries, reported to the Smithsonian Institution:

"The seahorse has the distinction of being one of the species of fish that 'talk.' It makes inaudible snapping noises with its jaws, which seem to serve as a means of communication."

The seahorse resembles the fearsome creatures of delirium tremens. It has the head of a small horse, the tail of a monkey, the shell of a beetle, the pouch of the kangaroo, and eyes which enable it to look forward and backward at the same time.

Despite its grotesque appearance the hippocampus is a small, feeble, almost defenseless creature, Ginsburg said.

Because it is a poor swimmer, it spends most of its time with its tail wrapped around the stem of a water plant. From this vantage point it snaps up other tiny sea animals floating within reach.

The eyes of the seahorse move independently of each other, making possible vision in two directions at the same time.

Proved It All Wrong

Smart Student Had Professor Thinking Figures Can Lie

"Arithmetic is a science of truth," said the professor earnestly. "Figures can't lie. For instance, if one can build a home in twelve days, twelve men can build it in one day."

"Yes," interrupted a quick-brained student. "Then 288 will build it in one hour, 17,280 in one minute, and 1,036,800 in one second. And I do not believe they could lay one brick in that time."

While the professor was still gasping the smart "ready reckoner" went on:

"Again if one ship can cross the Atlantic in six days, six ships can cross it in one day. I don't believe that either, so where's the truth in arithmetic?"

Then he sat down.

Germany is importing more chemicals than any other country.

Headed For Museum

Gold Piano in White House Is Costly But Ugly

The venerable gold piano at the White House which came to live there in the Administration of Theodore Roosevelt is soon to retire to the National Museum. For thirty years it has served in a musical capacity and as a "sight" for sightseers. Now it can be told, however, that it was not wholly a success in either respect. Talented musicians invited to play at the Executive Mansion have been known to hint that there were other pianos they would as willingly play. Its roccoco magnificence escaped neither notice nor comment. And thereby hangs a tale.

One time an attractive young schoolteacher from Massachusetts shepherded a group of students to Washington to see the capital at vacation time. Of course, the East Room and the gold piano were among the sights. The young teacher stepped up to the piano and put her hand on it.

"Please do not touch the furniture," admonished a guard, tapping her on the shoulder.

This teacher told the story years later.

"The piano was so ugly I felt like kicking it," she said.

That teacher was Grace Goodhue, she wrote Mrs. Calvin Coolidge and found the piano still there when she became mistress of the White House. Evidently, she never changed her opinion about it, for she is said to have confessed that she did give it couple of kicks when she could do so with no one say her nay.

Will Likely Take Part

Princess Elizabeth May Appear in Royal Procession at Coronation

Princess Elizabeth will probably take part in the Royal Procession in the Coronation, says the Daily Telegraph. Princess Margaret, on account of her age is expected only to "attend" the ceremony. Princess Elizabeth, who will then be 11 years old, may lead the procession of Princes and Princesses of the Blood Royal. She will probably wear a coronet, which she will place on her head when Queen Elizabeth is crowned. If she appears in the procession she will wear a robe of her rank and be attended by members of the Royal Household. The Princess will do homage by placing her coronet on her head when the Queen is crowned the homage performed by members of the female sex. Although her-presumptive, she will not do homage with the peers, one reason being that she is a minor.

The King and Queen and probably Princess Elizabeth will be central figures in the plans of the coronation of the year—that for the Athey pageant.

Just Mildly Interested

Spieler At Aviation Show Did Not Recognize Visitors

Two patrons of the Aviation Show in New York wandered through the hall the other day, pausing at each booth, says the New York Post. A spieler at the Manhattan Aviation School booth asked: "Are you boys interested in flying?" . . . When they nodded, he continued: "It's so easy to learn how to fly. Just give us a chance, and you know—some day you may be famous, recognized, etc."

"The men listened attentively, stated they were interested and delivered their address cards. One was Frank Hawkes. The other was Clyde Pangborn."

Place Names

"Odd names your towns have," commented the Englishman—"Weehawken, Hoboken, Poughkeepsie, Oshkosh."

"I suppose they do sound queer to English ears," the American agreed thoughtfully. "Do you live in London all the time?"

"No, indeed," said the unsuspecting Briton. "I spend part of mine in Chipping Norton and divide the rest between Biggleswade and Leighton Buzzard."

Coat And Tam Prove Easy-To-Knit

If you want her eyes to brighten with delight, knit her this adorable coat and tam of sporty yarn. Any four-to-eight year old will love this ensemble. The coat is mainly plain knitting, with cuffs and yoke in knit-stitch. This combination of knitting and purling is repeated in the tam. In pattern 5545 you will find complete instructions for a knitted coat and hat in sizes 4-8 and 8-12 (given in one pattern); illustrations of them and of all stitches used; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published.

Tug Boats Constructed At Quebec To Be Put In Service On Mackenzie River

Very Old Substance

Greeks Were First To Use Asbestos For Fireproofing

Asbestos, because it imprisons stagnant air between its fibrous particles of non-combustible minerals, is making the world fire-proof. This name of this substance, which the ancient Greeks knew all about, is a Greek word and was first applied by Pliny to a mineral which was mined in Greece and was later found to exist in Italy. To-day the world supplies come chiefly from Canada and South Africa.

This mineral rock is composed of iron and aluminum, and oddly, since it is fireproof, calcium and magnesium.

The first actual known use for asbestos for fireproofing was in the days when the Greeks, and later the Romans, manufactured burial urns out of it. The bodies were wrapped in the threads so that after the funeral fire died down, the ashes of the body could be separated from those of the fuel.

When the Emperor Charlemagne heard of asbestos he brought back one of his trips a tabcloth made of that material. It could be put in a fire and burned clean.

It was found that thin, silky threads of the mineral as long as six feet could be dug out of the ground, crushed and separated into a fibrous kind of plaster that could be used for a packing to insulate heat in the new steam engines. From that use as a packing in joints, laboratory research began to discover other uses for asbestos. Mixed with ordinary plasters it made heat-resisting panels and bricks for furnaces, and the thousand and one things which harness heat to power.

Heat is not only the basis of all life, but also is the basis of all fear. Humanity demanded that Nature's sure defense against fire should be turned to preventive uses, and so the secret of weaving the fibrous threads into a pliable medium that could be adapted to a thousand personal uses. To-day, asbestos is woven into fireproof blankets, gloves for airmen, suits for firemen, and fireproof walls and ceilings for houses.

The complete asbestos suit, with asbestos helmet and boots, came next. Secure in them men can today crawl about inside boiler furnaces while the furnaces are being stoked, heat radiating from an oxygen tank. A man recently stood a temperature of 1,500 degrees F. for three and a half minutes wearing such a suit.

Investigations Proceeding For Discovery Of Suitable Grasses

Experienced observers can easily recognize the principal forage crops, but many farmers find it difficult to distinguish between the principal grasses. Besides the difference in appearance, the characteristic root development, drought resistance, winter hardiness and other qualities of the grasses and clovers are not readily perceived.

Within each forage crop, there exists a vast number of types which may be separated only by plant breeders or others schooled in the recognition of selections. Such work is in progress at many of the experimental stations of the Dominion Department of Agriculture, and other agricultural institutions. Alfalfa was among the first to receive attention, though none of the Grimm selections have supplanted the parent material. Lucerne, too, has been fixed in type, and the Dominion Substation at Beaverlodge and others are concentrating on isolating and developing some of the likely-looking strains.

Commercial stocks of Western ryegrass have been added wild types indigenous to the West and three main selections are now recognized—Grazier, Eyra and Mecca.

Brome is the best all-around grass for the Park belt but common stocks are difficult to eradicate. The Parkland selection, being more leafy and having less vigorous creeping roots, will soon be distributed and may overcome some of the shortcomings of the imported material. As much can be said for other crops. While on the watch for valuable introductions from other lands, there is still plenty of improvement to be made on the material now at hand. Canada is a recognized leader in this phase of agricultural investigation.

Feed Mixing Mill

What is claimed to be the only feed mixing and alfalfa meal mill on the Prairies is in operation at Lethbridge. The products are straight alfalfa meal and mixed feeds for individuals and companies. Some of the meal has gone to Homolula and last year a shipment was ordered from England. Owing to shortage of feed there have been no shipments to the United Kingdom this year.

Montreal, 1,000 miles from the Atlantic, is still 600 miles nearer Liverpool, England, than New York.

British's battleship Malaysia has been refitted at a cost of \$5,000,000.

Two large craft of the push-tug type are under construction at Sorel, Quebec, for use on the Mackenzie, Athabasca and Slave Rivers, 2,000 miles away in Canada's far north where many of the river bends are so short it is impossible to pull a scow around corners.

Construction of the two "tugs" writes an interesting page for shipbuilding in Canada. Similar craft are in use on the Nile in Egypt. Hitherto river navigation in the Canadian north has been in old type wooden stern wheelers. The new boats will be of the steel twin-screw tunnel type, permitting very shallow draft. The one designed for use on the Athabasca and Slave rivers draws only 21 inches when loaded.

An extraordinary portage across half a continent, the boats will go into service this summer carrying supplies to the mining camps of the Northwest Territories and bringing back radium concentrates and other ores. This will mark another step in the northern march of civilization. The boats will be equipped with refrigeration chambers, making it possible for the first time to transport fresh meats and dairy products in quantity for regular distribution.

Of welded steel construction, the boats will be assembled just as they will be launched 2,000 miles away. Workmen will then saw them into 20-foot sections—like you would cut a cake. Thus they will be shipped on railway cars to railroad at Sorel, ways and carried by sleigh and tractor to Fort McMurray.

Twenty-three passengers and a crew of ten will find accommodation on the first "tug" when this summer service on the Athabasca and Slave Rivers between Fort McMurray and Fitzgerald in May. The vessel will be 86 feet long and 20 feet broad. It will afford cabin accommodation for eight passengers, deck facilities for the others. The second boat will ply between Fort Smith and Fort Norman on the Mackenzie River and Great Slave Lake.

Of significance to the north country and to the mining industry of the Dominion is the fact these boats will make it possible to bring out three times the quantity of radium concentrates that can now be transported by railroads. They are being constructed for the Northern Transportation Company, wholly owned subsidiary of Eldorado Gold Mines Limited, whose radium mine is at Labine Point on Great Bear Lake.

Scotland Receives Orders From Canada And Other Countries

Hand-woven tartan cloth is in demand, and throughout Renfrewshire, and more especially in the village of Kilbarhan in Scotland, famed for centuries for its handloom weaving, many orders have been received.

These are not only Scottish orders. Many have been received from abroad, especially from Australia, Canada, and America. Much of the work, of course, will be done on power-loom weaving machines.

Only the cloth is woven in Kilbarhan, and it is then sent to various firms to be made into kilts, scarves and rugs. Large quantities are being woven in every variety of tartan.

At one time there was a large number of weavers in Kilbarhan, but the group has now been reduced to 15, and these men, helped by their wives, are fully employed in coping with the orders.

Esquimo Finds Old Papers

Pertaining To Voyage Of Rescue Ship In 1854

Charles Brower, Arctic trader, studied faded papers pertaining to the voyage of the British ship Enterprise in search of the Sir John Franklin expedition 57 years ago. An Eskimo said he found the can on a beach 300 miles east of Point Barrow.

Brower intends to forward the papers to the British Admiralty for historical purposes.

H.M.S. Enterprise, commanded by Capt. Richard Collinson, was one of many ships which searched for the lost Franklin expedition, last seen in 1845. The Enterprise was at Point Barrow in 1854.

It was not until 1879-80 the bodies of some members of the Franklin expedition were found, though proof of their deaths was established in 1859 by possessions returned on H.M.S. Fox.

Receives Appointment

Various appointments to the king's household were published in the London Gazette, many of the offices being retained by those who held them under Edward VIII. Of particular interest to Canada was the appointment of Sir Eric Meville as one of the king's three assistant private secretaries. Sir Eric was secretary to the Earl of Willington during his term as governor-general of Canada.

Lincoln

LINCOLN.—We are glad to see that Mrs. Herb Dool is on the mend again after having had the misfortune to fall and break three ribs. Mr. and Mrs. Howard Saunders and family and Mrs. Lee Smith and family were Sunday visitors at the home of Mr. and Mrs. Herb Dool. A number of friends met at the home of Mrs. W. Dool on Monday last, when a shower was held in honor of Mrs. E. Sherin (nee Maudie Dool). A pleasant afternoon was spent and everyone wishes Maudie the best of luck in her new home, which is to be at Buck Lake. Mr. and Mrs. Clyde Hammond are receiving congratulations on the birth of a baby girl.

Our stock of Linoleum has arrived and the patterns are all new ones at Lacombe Furniture Store—Adv.

"Anthony Adverse" At Avalon Theatre

"Anthony Adverse," the monumental literary classic which swept the country two years ago, comes to life on the screen at the Avalon Theatre this Thursday, Friday and Saturday.

Freddie March has the stellar role, with beautiful and talented Olivia de Havilland playing the leading feminine role. A supporting cast, second to none in size and ability, backs the two stars admirably. In order to give this sweeping panoramic story the magnificence and magnitude it merited, Warner Bros., the producers are said to have spared neither time, nor effort, nor cost. In fact, more than two years were spent in preparing the script, in research work to make perfect the atmospheric settings, and in the actual filming of the many and intricate scenes.

Westling

WESTLING.—Miss Gladys Jeglum is ill in Lacombe hospital and we wish her a speedy recovery. W. Johnson underwent an operation in the Lacombe hospital last week, having his appendix removed. We all wish him a speedy recovery. Mrs. Anna Westling has moved into her new home here.

Mr. and Mrs. A. Strandberg were Lacombe visitors Thursday.

Miss Ruth Bucknell has been visiting at the home of Mr. and Mrs. Ernie Westling.

Vernon Westling, who has been attending a convention in Regina, returned home last week. The Chateleine Club will meet in the Westling Hall on Wednesday afternoon.

Blackfalds

BLACKFALDS.—We regret very much to have four deaths to report this week. On Tuesday, April 13th, Mrs. J. Laing died after an illness which had kept her in bed for about two years during which time she suffered intense pain. Her funeral took place last Thursday from the local church and a very large number of people were there to pay their last respects to the deceased.

There were many beautiful floral tributes. The Rev. Mr. Burgett of the Calgary Bible Prophecy Institute conducted the service. Early Friday morning of last week Mrs. Wilfred Hunt passed away after an illness lasting five months, most of which she spent in a cast. Her funeral took place at Lacombe on Sunday, with the Rev. W. E. Herbert officiating.

On Friday night of last week Mrs. Frank Jones died. She had been suffering from heart trouble and a sudden stroke carried her away. On Saturday, Mr. Stewart Taylor died, and both were buried at Lacombe on Monday of last week.

George Wade is sporting a new Ford V-8.

Play Is Presented

Last Friday evening the Blindman's Club put on a play entitled "The Man in the Green Shirt," to a fairly large house. All parts were portrayed very well, the lead parts being Miss Ruth Miller and Arthur Wignmore, and a thoroughly enjoyable evening resulted. Between the acts, songs were given by Goldie Rowe and the Miller brothers, John and Clifford, the accompaniment being on their guitars. Miss Margaret Wignmore also played a guitar solo.

Owing to the resignation of John Sulik from the village council, an election seemed necessary, but when nomination day came, Tom Plumb withdrew his candidature, leaving C. M. Mair alone in the field, and Mr. Mair was declared elected by acclamation.

Mrs. Mair's indisposition has lasted for about a month, but she is now on her feet again, and it is hoped she will continue to improve. Mr. Golightly has purchased a tractor for his farm.

Miss Smith's indisposition proved more serious than she at first thought and her doctor advised her to remain at home for three weeks. The School Board has engaged Mrs. Baldwin of Eckville to substitute for Miss Smith during her illness.

May Build Addition
The School Board is considering plans for the addition of a new room to the old school building, in order to house all three rooms under one roof.

Thank to the mild weather experienced during the past few weeks, several farmers near the village have started spring work and some seeding has already been done. Farther west, the ground is still too wet to commence spring operations. We around the village could do with a good drenching rain, as there was not a great deal of snow during the past winter. Most of the local gardens have been plowed, but apart from lettuce and radishes, little seeding has been done.

A shower was held last Wednesday at the home of Mrs. Bernard Hagedorn, in honor of Mrs. Park (nee Inga Amundson). There was a large attendance and the young bride was the recipient of many nice presents. Two contests were held during the evening and prizes were won by Mrs. Jim Miller and Mrs. Oscar Headmark.

Last Sunday's church service was held by Dr. Grant of the Metropolitan Church, Edmonton.

Mr. Bell has returned from a trip to Turner Valley.

Health Clinic to Visit
The Red Deer Health Clinic is to visit the school again on Thursday, April 22.

Mrs. Tom Long is on the sick list and it is feared she may have to undergo an operation. Harry Brewer has also been troubled with his appendix but hopes to avoid an operation.

We understand Francis Long (Stub) has moved to Ponoka. Irwin Goodwin is working for Mr. Martin.

Mrs. Walker was a visitor to Calgary last week.

The latest (and we hope the last) measles victim has been Mrs. Old Larson. Practically all the children in the village have now had it.

EXPORTS TO JAPAN
Canada, next to Australia, was the largest supplier of wheat to Japan in 1936. At the same time, Canada not only maintained but increased her position as the largest exporter of lead, aluminum and newsprint to the land of the rising sun. Among the many other exports from Canada were hockey sticks, skates and pucks.

The Smithsonian Institute in Washington, D.C., was founded with funds left by James Smithsonian.

TOURIST TRADE MAY EXCEED PEAK YEAR OF 1929
Tourist trade may reach a volume in 1937 in excess of its peak year in 1929 if the same percentage of increase is maintained as last year.

According to the Dominion Bureau of Statistics, it is likely to be worth more than \$300,000,000, and if it is, its return will represent at least five per cent of the national income. This is the equivalent of \$30 for every man, woman and child in the entire Dominion, or to an average year's income for half a million people.

Here is an industry that is worth careful conservation and further development. A \$300,000,000 business, with such encouraging prospects of progressive increase, is an important consideration to this country.

Tourists spent \$25,000,000 in this country in 1936. An increase over the previous year of \$43,000,000. A similar rate of increase should be attainable this year with the well directed efforts of the Travel Bureau at Ottawa, and the tourist organizations now so efficiently functioning in all provinces of the Dominion.

The Churches

CHURCH OF ENGLAND IN CANADA

St. Cyprian's Church, Lacombe
Incumbent: The Rev. W. E. Herbert
Licensed Lay Readers: E. H. Jones, K.C. and A. T. Inskip
Organist: Miss Alice Inskip

10:00 a.m.—Sunday School.
7:30 p.m.—Evangelism and sermon.

Blackfalds—Children's Service at 11 a.m.; Holy Communion at 11:30 a.m.

Rimby—Evangelism at 2:30 p.m. Monday—Cubs will meet in St. Cyprian's Hall at 7:30 p.m.

Tuesday—Scouts will meet at 7:30 p.m. in St. Cyprian's Hall.

Thursday—Junior Choir will meet at 4 p.m.

Friday—Confirmation Class at 4:30 p.m.

CHRISTIAN SCIENCE

At all Christian Science churches next Sunday, the subject of the Lesson-Sermon will be "Probation After Death." The following is one of the Scriptural quotations contained in the Lesson-Sermon: "Blessed and holy is he that hath part in the first resurrection; on such the second death hath no power, but they shall be priests of God and of Christ, and shall reign with him a thousand years" (Revelation 20:6).

One of the correlative passages from "Science and Health with Key to the Scriptures," by Mary Baker Eddy, is as follows (pages 68, 290): "The way through which immortality and life are earned is not ecclesiastical but Christian, not human but divine, not physical but metaphysical, not material but scientifically spiritual. To the spiritual class, relates the Scripture: 'On such the second death hath no power.'"

ST. ANDREW'S UNITED CHURCH

Rev. R. B. Layton, R.D. Minister
SUNDAY, APRIL 26th
Services at 11 a.m. and 7:30 p.m.

Sunday School at 11 a.m.
The Bible Study Class meets on Wednesday at 8 p.m.

Anniversary Envelopes may be handed directly to Mr. Finlayson or put upon the plate.

Sunny Crest Specs

By SPY

SUNNY CREST.—It is quite a while since we have had such an early Spring. Many bon-fires and curling smoke are evidence that many residents are out in their gardens, raking and burning, and finding some shooting perennial flowers.

Last week the first wheat was sown in our district. Al Saunders, Theodore Fisher and Herbert Woods have considerable seeding done.

Franklin Dole celebrated his 8th birthday on Saturday, April 17th, by entertaining some of his little friends at games. A lovely birthday cake was included in the refreshments served.

Home for Wedding
Mr. and Mrs. Charles Mickey were home for the wedding of Maudie Dole, sister of Mrs. Mickey. They visited with Grandma Moore and Charlie Mickey, as well as with the home folk in Lincoln.

Many friends in Sunny Crest attended the wedding dance at Lincoln last Friday night.

There will be choir practice at the school house Friday night.

Topic for Sunday service conducted by Rev. Matthews is "Seed Sowing by Three Farmers."

The World of Wheat

By H. G. L. STRANGE
Director, "Crop Testing Plan"

The Spring wheat crops now being seeded in Western Canada and in the northwestern part of the U.S. will be anxiously watched by the whole world, for the progress of these two crops will unquestionably have an important effect upon wheat prices during the coming months.

As these crops flourish, prices will tend to decline, but should their prospects become lessened, then the prices will tend to rise.

What are the actual prospects at this moment?

Moisture records collected and compiled daily from over 600 rain gauges in Western Canada by the Research Department of the Searle Grain Co. indicate that probably never has the Canadian crop—and this refers to the U.S. crop also—started with so little moisture reserve in the soil.

The records show that at the moment Alberta has only 80 per cent of the normal subsoil moisture, Saskatchewan 57 per cent and Manitoba 68 per cent.

This means that if an average crop (which would be about 400 million bushels on our present western wheat acreage) is to be secured, that very much better than average rainfall—which average is about 8 inches—must occur between this time and August 1st next.

Rainfall, therefore, will be the important factor to watch.

The following factors have tended to raise prices: Roumania temporarily prohibits wheat exports; Broomhall may raise import requirement estimate; Russia needed to condition soil for seeding in southern hemisphere; Cold weather retards Russian Spring seedlings; Polish winter wheat crop prospects doubtful; Spring seedlings delayed in U.S.; Spain still contracting for wheat.

The following factors have tended to lower prices: Rains break long drought in Central China; Australian wheat estimate increased 15 million; U.S. government estimates winter wheat crop at 650 million; Beneficial rains in Western Canada; Uncertainty of gold policy in Great Britain and U.S.; France removes import license taxes on apples and pears.

Spruceville

SPRUCEVILLE.—Jack Reid of Camrose was visiting with his sister, Mrs. Bob Boden, over the week-end. The Busy Bees agreed at their last meeting to make and raffle a quilt to help pay the expenses of the two juniors going to University Week in June.

Mrs. Heath, Sr., motored down from Edmonton Saturday and spent the night with Mrs. Jones of Lacombe, returning to Edmonton on Sunday.

Mrs. Laura Young is receiving congratulations on holding the lucky ticket in Thursday's "Wabasso" draw in Lacombe.

Mrs. George Newton (nee Miss Annie Braithwaite) spent the week-end with her parents.

Good Attendance at Play
Despite the fact that everyone is so busy on the land, there was quite a good attendance at the play presented by some Lakeside folk at Spruceville Hall Friday night. The dance, in fact, was quite crowded and everyone seemed to enjoy themselves.

The regular meeting of the U.F.W.A. will be held at the home of Mrs. Johnnie Hutchinson on Wednesday next, April 28th. The subject for discussion is "Health," led by Dole, sister of Mrs. Mickey. They will be followed by "Health Facts," the roll call being "Health Facts."

Wilfred Hunt, for two years chairman of our Wood Nook school Board, was sadly bereaved last week by the untimely death of his wife. He has the sympathy of the whole community. There are two children of school age, Bobbie and Barbara, also left to mourn their mother's loss.

Mrs. Morley Bradley of Lincoln visited with her mother, Mrs. Stout, on Tuesday.

Little Norma Gottschlich has had her tonsils out this week.

The Battle of Vimy Ridge took place from April 6th to 9th, 1917.

The Satin Glo Paint Sale this year is from April 16 to April 24, inclusive, and the 24th is positively the last date. Get your requirements at Lacombe Furniture Store—Adv.

CALGARY

Lincoln

LINCOLN.—We are glad to see that Mrs. Herb Dool is on the mend again after having had the misfortune to fall and break three ribs. Mr. and Mrs. Howard Saunders and family and Mrs. Lee Smith and family were Sunday visitors at the home of Mr. and Mrs. Herb Dool. A number of friends met at the home of Mrs. W. Dool on Monday last, when a shower was held in honor of Mrs. E. Sherin (nee Maudie Dool). A pleasant afternoon was spent and everyone wishes Maudie the best of luck in her new home, which is to be at Buck Lake. Mr. and Mrs. Clyde Hammond are receiving congratulations on the birth of a baby girl.

Our stock of Linoleum has arrived and the patterns are all new ones at Lacombe Furniture Store—Adv.

"Anthony Adverse" At Avalon Theatre

"Anthony Adverse," the monumental literary classic which swept the country two years ago, comes to life on the screen at the Avalon Theatre this Thursday, Friday and Saturday.

Freddie March has the stellar role, with beautiful and talented Olivia de Havilland playing the leading feminine role. A supporting cast, second to none in size and ability, backs the two stars admirably. In order to give this sweeping panoramic story the magnificence and magnitude it merited, Warner Bros., the producers are said to have spared neither time, nor effort, nor cost. In fact, more than two years were spent in preparing the script, in research work to make perfect the atmospheric settings, and in the actual filming of the many and intricate scenes.

Westling

WESTLING.—Miss Gladys Jeglum is ill in Lacombe hospital and we wish her a speedy recovery. W. Johnson underwent an operation in the Lacombe hospital last week, having his appendix removed. We all wish him a speedy recovery. Mrs. Anna Westling has moved into her new home here.

Mr. and Mrs. A. Strandberg were Lacombe visitors Thursday.

Miss Ruth Bucknell has been visiting at the home of Mr. and Mrs. Ernie Westling.

Vernon Westling, who has been attending a convention in Regina, returned home last week. The Chateleine Club will meet in the Westling Hall on Wednesday afternoon.

Blackfalds

BLACKFALDS.—We regret very much to have four deaths to report this week. On Tuesday, April 13th, Mrs. J. Laing died after an illness which had kept her in bed for about two years during which time she suffered intense pain. Her funeral took place last Thursday from the local church and a very large number of people were there to pay their last respects to the deceased.

There were many beautiful floral tributes. The Rev. Mr. Burgett of the Calgary Bible Prophecy Institute conducted the service. Early Friday morning of last week Mrs. Wilfred Hunt passed away after an illness lasting five months, most of which she spent in a cast. Her funeral took place at Lacombe on Sunday, with the Rev. W. E. Herbert officiating.

On Friday night of last week Mrs. Frank Jones died. She had been suffering from heart trouble and a sudden stroke carried her away. On Saturday, Mr. Stewart Taylor died, and both were buried at Lacombe on Monday of last week.

George Wade is sporting a new Ford V-8.

Play Is Presented

Last Friday evening the Blindman's Club put on a play entitled "The Man in the Green Shirt," to a fairly large house. All parts were portrayed very well, the lead parts being Miss Ruth Miller and Arthur Wignmore, and a thoroughly enjoyable evening resulted. Between the acts, songs were given by Goldie Rowe and the Miller brothers, John and Clifford, the accompaniment being on their guitars. Miss Margaret Wignmore also played a guitar solo.

Owing to the resignation of John Sulik from the village council, an election seemed necessary, but when nomination day came, Tom Plumb withdrew his candidature, leaving C. M. Mair alone in the field, and Mr. Mair was declared elected by acclamation.

Mrs. Mair's indisposition has lasted for about a month, but she is now on her feet again, and it is hoped she will continue to improve. Mr. Golightly has purchased a tractor for his farm.

Miss Smith's indisposition proved more serious than she at first thought and her doctor advised her to remain at home for three weeks. The School Board has engaged Mrs. Baldwin of Eckville to substitute for Miss Smith during her illness.

May Build Addition
The School Board is considering plans for the addition of a new room to the old school building, in order to house all three rooms under one roof.

Thank to the mild weather experienced during the past few weeks, several farmers near the village have started spring work and some seeding has already been done. Farther west, the ground is still too wet to commence spring operations. We around the village could do with a good drenching rain, as there was not a great deal of snow during the past winter. Most of the local gardens have been plowed, but apart from lettuce and radishes, little seeding has been done.

A shower was held last Wednesday at the home of Mrs. Bernard Hagedorn, in honor of Mrs. Park (nee Inga Amundson). There was a large attendance and the young bride was the recipient of many nice presents. Two contests were held during the evening and prizes were won by Mrs. Jim Miller and Mrs. Oscar Headmark.

Last Sunday's church service was held by Dr. Grant of the Metropolitan Church, Edmonton.

Mr. Bell has returned from a trip to Turner Valley.

Health Clinic to Visit
The Red Deer Health Clinic is to visit the school again on Thursday, April 22.

Mrs. Tom Long is on the sick list and it is feared she may have to undergo an operation. Harry Brewer has also been troubled with his appendix but hopes to avoid an operation.

We understand Francis Long (Stub) has moved to Ponoka. Irwin Goodwin is working for Mr. Martin.

Mrs. Walker was a visitor to Calgary last week.

The latest (and we hope the last) measles victim has been Mrs. Old Larson. Practically all the children in the village have now had it.

How mother helps to PREVENT MANY COLDS

At That First Sniffle

It means—signs that a cold may be coming on...

Quick! A Few Drops of Vicks-Va-tro-nol up each nostril

It spreads

Its scientific medication swiftly spreads through nose and upper throat—where 9 out of 10 colds start

Mother relies on Va-tro-nol to help in preventing her own colds, too. She can feel the tingle as this scientific medication spreads through the trouble zone in her nose and upper throat.

Va-tro-nol is specially prepared to stimulate Nature's defenses in this area. Used in time, Va-tro-nol helps to prevent many colds... and to prevent colds from spreading.

Quickly relieves "Stuffy Head"

VICKS VA-TRO-NOL

Mother! Look in your Va-tro-nol package for full details of Vicks-Va-tro-nol's scientific home guide to greater freedom from colds. In clinic tests among 17,353 people, this Va-tro-nol medicine from colds more than half!

Follow Vicks Plan for Better Control of Colds

WORLD HAPPENINGS BRIEFLY TOLD

A special attraction in London during coronation time will be an exhibition of the intimate possessions of royalty in Europe during the last 400 years.

James Dawson, 80, one of the original members of the Royal North West Mounted Police, died in hospital at Red Deer. He was born in Toronto.

The house where Edgar Allan Poe is said to have written "The Gold Bug" and "The Raven," was sold for \$7,000 at sheriff's sale to Richard Gimbel for presentation to Philadelphia as a memorial.

Lieutenant-Commander Donald B. MacMillan, noted explorer, announced he would leave Boston June 10 on his 16th Arctic expedition with a party of about 30 scientists and college students.

King George VI. will hold a levee at Holyrood Castle, Scotland, July 8. He will receive officers of the army, navy and air force stationed in Scotland, high officials, members of parliament and leading Scottish citizens.

Detroit weather bureau officials checked records and reported ice conditions on the Great Lakes this winter were easiest since the bureau began in 1892. Commercial fishing has been almost uninterrupted for the first winter on record.

Word reached London that a trio of British motorists, including H. E. Symons, completed a 2,000-mile trip across the Sahara desert from Algiers to Kano, in Nigeria, believed the first successful crossing of the Sahara, by a luxury car (Rolls Royce).

The British government is aware of several cases of sabotage in armament factories working on government orders and "appropriate action will be taken by the appropriate authorities," Geoffrey Lloyd, under-secretary of state for home affairs, informed the House of Commons.

Its Original Meaning

Porridge Had Number Of Ingredients And Was Called Pottage

An exchange notes that the Scotch refer to "porridge" as "them." Originally, of course, it had a number of ingredients. The word "porridge," in fact, is just another form of "pottage" and the Oxford dictionary gives its early meaning as "pottage" or soup made by stewing vegetables, herbs or meat, often thickened with oat porridge or other farinaceous addition." This use of the word (and in the plural) is illustrated by a quotation dating from 1550: "Having a few pottage made of the broth of the same beefe with ale and otemell." Perhaps "bye" became scarce at that rate the "otemell" seems all that's left to porridge nowadays. Toronto Star Weekly.

For \$32, a tourist can have the Acropolis, in Athens, privately illuminated by great floodlights for two hours on any night.

Russia is teaching scientific mining to thousands of mine workers.

Link Between Parliaments

Ottawa Receives Century Old Carvings From British House Of Commons

Century-old stone carvings of the lion and unicorn adorning a lion and unicorn, formerly decorations of the British House of Commons, are now temporarily erected on either side of the entrance to the Parliamentary Library in Ottawa, awaiting inspection of members.

If the location is suitable the plate which accompanied the sculptures, part of the royal arms, will be erected with this inscription in French and English:

"This lion and this unicorn, forming part of the royal coat of arms, were removed from the stone work of the Houses of Parliament, Westminster, and presented to the Dominion House of Commons by the Empire Parliamentary Association, United Kingdom Branch."

For the past seven years the British Parliament building has been undergoing restoration made necessary by the corrosion caused by the saline atmosphere of the Thames district. By a special process huge corroded blocks were withdrawn and new ones substituted, so that a patched appearance resulted and scraping and remodeling was necessary. About 50 carvings had to be removed, among them the lion and unicorn, about five feet, eight inches in height, joined by the shield which was smashed in removal.

Dr. Arthur Beauchamp, clerk of the House of Commons, saw them in the yard of the Speaker's quarters in London when he was in England for the silver jubilee ceremonies in 1935. On his return to Canada he opened correspondence with Sir Howard D'Elville, Secretary of the United Kingdom Branch of the Empire Parliamentary Association, seeking to obtain them for Parliament here. They were presented as a gesture of friendship and goodwill and as a historic link between the two parliaments.

Saskatchewan Salt Plant

Producing Sodium Sulphate 99 Per Cent. Plus Is Purify

The Olan Salt Company, operating on the shore of White Lake, west of Biggar, Sask., has succeeded in producing sodium sulphate 99 per cent. plus in purity, and has decided to increase plant facilities to 100 tons a day.

Experimental work has been conducted at a small pilot plant, with the result that a product of purity that will compete with the finest imported German product, according to information given out by Hon. W. F. Kerr.

The refining process to be used in the new plant is one patented in the name of S. J. Davies, of Calgary.

The pilot plant has been closed down to permit of the expansion, which will be carried out during the present year. The successful production with respect to the purity of the product, is the culmination of more than three years of experimental work. It is claimed, Mr. Kerr states, that the method of production will be the lowest per ton cost on the basis of 100 tons a day of any plant on the North American continent.—Regina Leader-Post.

Structural Glass

Skyscrapers And Homes To Be Made Of Glass In The Future

All indications seem to point to extraordinary activity in building during the coming year. And all sorts of innovations in style, materials and workmanship are expected.

One of the most startling was described by an architectural engineer, speaking recently before some of the nation's leading architects and construction experts. This was the fact: developing use of structural glass.

Already there is an increasing demand for it for use in kitchens and bathrooms in homes, for fireplace facing and exterior facing on new buildings, and in modernization work.

But this engineer predicted practical skyscrapers whose exteriors would be entirely of glass.

One type of structural glass is manufactured in the same way as ordinary glass, with coloring ingredients added, to color it and make it opaque. It can be surfaced with any of the finishes applied to ordinary glass—acid-etching, sand blasting, and inlay with other colored glass.—Forbes Magazine.

Flares Banned For Day

No aeroplane will be permitted to fly over London on Coronation Day, May 12. The air ministry warned aviators. The ban will be in effect for 24 hours, from midnight May 11 to midnight May 12. Flights will be prohibited within a radius of five miles from Buckingham Palace.

Voting is not a good old American custom. Citizens of the Greek city states, the Roman Empire, and the Germanic tribes voted long before our time.

During the windy spring months, Nature prunes her trees by breaking off the dead limbs to make room for new ones.

The vilest-smelling compound known to man is mercaptan.

Russia's iron output is lagging behind demand.

Canadians Are Movie Fans

Average Attendance Is Once A Month For Everybody In Canada

Motion pictures, which provide a popular medium of entertainment to both the rich and the poor, form the basis of a very substantial industry in Canada. Figures released by the Dominion Bureau of Statistics show that there were 856 motion picture houses in the Dominion in 1935 with a total of 116,978,500 paid admissions and \$27,173,400 in receipts, exclusive of amusement taxes, compared with 799 theatres with 107,718,000 admissions and \$25,338,100 in receipts during 1934. The average admission price was 23.2 cents in 1935 compared with 23.6 cents in 1934.

Motion picture theatres in Canada have a combined seating capacity of more than half a million, and each seat is occupied between four and five times a week on the average. It is estimated that the average attendance at the "movies" for Canadians is about once a month for everybody old enough to go. The per capita expenditure on motion picture entertainment in 1935 was \$2.45 compared with \$2.34 in 1934 and \$3.77 in 1930. To the average theatre patron this amount seems small, but the per capita expenditure on motion pictures is exceeded by many factors such as rates of admission, distribution of the population by age, provincial regulations governing the admission of juveniles, etc. Attendance appears to be dependent to a large degree upon convenience, and naturally is higher in urban areas where the theatres are close at hand.

Just Matter Of Taste

But Many War Time Dishes Have Little Appeal

London Letter in the Ottawa Journal says some of the news from Madrid is more picturesque than reliable. But if it is indeed true that the inhabitants of the Spanish capital are now reduced to eating cats, this is not quite a novel expedient even in Western Europe.

During the siege of Paris in the 1870 Franco-Prussian war, the Parisians ate cats as well as still less appetizing things, and Mr. Henry Labouchere, the famous Radical M.P., and editor of Truth, insisted that it was "delicious." He described it as something between squirrel and rabbit, with a flavor of its own, and recommended kitted ragout smothered in onions as an excellent item in the menu.

Most of the animals in the Paris Zoo of that date went into the stew pot, a curious expedient being that of the monkeys, however, on Darwinian theory that it would amount almost to cannibalism to eat their ancestral poor relations. Yet monkeys are a luxury in some parts of South America. A war correspondent friend of mine, who once tried them, assured me that parrots are a gastronomic catastrophe.

A penknife weighing 42 pounds and having 181 blades is the largest ever made. It is valued at more than \$7,500.

In Switzerland, Swiss cheese is generally marketed in large, bulging wheels of 100 to 200 pounds.

German Foreign Securities

Nazi Government Makes Move To Keep Money At Home

Germany clamped a strict ban on trading in foreign securities to complete restrictions initiated last October governing all German-owned foreign securities.

Such securities must be sold to the Reichsbank or to Devisen banks in the future, at a "fair price" to be fixed by the Reichbank, the government announced.

Any other trading may be carried on only with special government permission. Quotations on foreign securities were immediately discontinued on German bourses. The order will effect more than 200 foreign issues.

Bankers estimated that Germans hold foreign securities worth more than 2,000,000,000 marks (about \$624,000,000) including bonds and shares on deposit abroad as well as in Germany.

The government's move serves the double purpose of keeping future German investments at home and mobilizing existing foreign holdings for an emergency.

A noted Chicago scalp specialist states that the average person who reaches the age of 60 without becoming bald grows about 15 crops of hair, a new one every four years.

Shanghai, China, will inspect tea to improve export quality.

Check On Pilots

United States To Experiment With Airline Safety Device

United States air commerce bureau officials reported they soon will begin experiments with one of the newest airline safety devices—a "mechanical eye" which will secretly record how pilots handle their planes.

The instrument, known as an "air log," is a cylindrical, metal enclosed gadget fitted into plane to record speed, direction, altitude and other data during flight.

By studying the record, officials said, airline supervisors can tell much about how efficiently the pilot operated his plane and whether he observed all safety regulations and instructions.

Very Few Orators Now

Speakers Of To-Day Are Lacking In Eloquence

Years ago a platform speaker would be thrilled with divine eloquence, and their orations were listened to by many thousands. There were great preachers also in those days, and while men went to church to be thrilled with divine eloquence, that was better than not going at all. The Lauriers, the Olsons, and the Blackstocks of the law are seldom heard now because their counterparts do not exist. Men travelled long distances in their day to hear them present cases to juries. Few bother to-day, because the eloquence for which they were famous died with their passing. Giuseppe Mercury.

St. Elmo's Fire

The phenomenon known as "St. Elmo's Fire" is identical in character with the "brush" discharges, or incomplete sparks produced by electric machines. It makes a peculiar crackling noise and frequently is heard in the daytime when it cannot be seen.

Violin strings are made from sheep gut and the strings on the bows from horsehair, while the wood of the bows come from Brazil.

Air mail postage in Britain is to be reduced to three cents a half ounce.

Cleveland public library exhibited a carving of a miniature Chinese boat in 1936. The boat, of intricate design, was carved from a peach stone.

The largest sea serpent known to science is a sea cobra, a paddle-tailed snake which attains a length of 10 feet.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Ready to go

The liver should get two pounds of bile into your system daily. If this bile is not flowing freely, you feel drowsy, sluggish, you lose your appetite, you get indigestion, you feel bloated, you feel heavy, you feel tired, you feel old, and you feel like a zombie.

A more recent discovery shows that the liver should get two pounds of bile into your system daily. If this bile is not flowing freely, you feel drowsy, sluggish, you lose your appetite, you get indigestion, you feel bloated, you feel heavy, you feel tired, you feel old, and you feel like a zombie.

George Riddell never had a teacher; never learned a note of music except by picking it up when he lay in the fields as a lad and traced printed notes by the sounds he knew they represented. One of the greatest violinists Scotland has known for generations, he has composed an enormous amount of music which will take its place among the finest native compositions. The late Sir William Boulton, chairman of an Edinburgh musical organization, said he would be happy if he could claim the authorship of Mr. Riddell's song, "The Tarrin' o' the Yoll." "How I admire your genius," he wrote the composer on his death, "and I am sure that you will be remembered for generations to come."

From the stamper July 9 and 10. From there His Excellency will likely go for a week to the vicinity of Red Deer and Rocky Mountain House.

On July 21 Lord Tweedsmuir will leave Waterways for Akavik by air, arriving there about Aug. 6. Then he intends to fly to Herschel Island, 100 miles north of Akavik, and he will return to Edmonton by air.

From Edmonton, His Excellency will go to Burns Lake and Creek through the Tweedsmuir National park to Bella Coola, B.C. It is likely he will take a steamer from Bella Coola to Prince Rupert and return to Eastern Canada from there, arriving in Ottawa the first week in September.

German Foreign Securities

Nazi Government Makes Move To Keep Money At Home

Germany clamped a strict ban on trading in foreign securities to complete restrictions initiated last October governing all German-owned foreign securities.

Such securities must be sold to the Reichsbank or to Devisen banks in the future, at a "fair price" to be fixed by the Reichbank, the government announced.

Any other trading may be carried on only with special government permission. Quotations on foreign securities were immediately discontinued on German bourses. The order will effect more than 200 foreign issues.

Bankers estimated that Germans hold foreign securities worth more than 2,000,000,000 marks (about \$624,000,000) including bonds and shares on deposit abroad as well as in Germany.

The government's move serves the double purpose of keeping future German investments at home and mobilizing existing foreign holdings for an emergency.

A noted Chicago scalp specialist states that the average person who reaches the age of 60 without becoming bald grows about 15 crops of hair, a new one every four years.

Shanghai, China, will inspect tea to improve export quality.

Check On Pilots

United States To Experiment With Airline Safety Device

United States air commerce bureau officials reported they soon will begin experiments with one of the newest airline safety devices—a "mechanical eye" which will secretly record how pilots handle their planes.

The instrument, known as an "air log," is a cylindrical, metal enclosed gadget fitted into plane to record speed, direction, altitude and other data during flight.

By studying the record, officials said, airline supervisors can tell much about how efficiently the pilot operated his plane and whether he observed all safety regulations and instructions.

Very Few Orators Now

Speakers Of To-Day Are Lacking In Eloquence

Years ago a platform speaker would be thrilled with divine eloquence, and their orations were listened to by many thousands. There were great preachers also in those days, and while men went to church to be thrilled with divine eloquence, that was better than not going at all. The Lauriers, the Olsons, and the Blackstocks of the law are seldom heard now because their counterparts do not exist. Men travelled long distances in their day to hear them present cases to juries. Few bother to-day, because the eloquence for which they were famous died with their passing. Giuseppe Mercury.

St. Elmo's Fire

The phenomenon known as "St. Elmo's Fire" is identical in character with the "brush" discharges, or incomplete sparks produced by electric machines. It makes a peculiar crackling noise and frequently is heard in the daytime when it cannot be seen.

Violin strings are made from sheep gut and the strings on the bows from horsehair, while the wood of the bows come from Brazil.

Air mail postage in Britain is to be reduced to three cents a half ounce.

Cleveland public library exhibited a carving of a miniature Chinese boat in 1936. The boat, of intricate design, was carved from a peach stone.

The largest sea serpent known to science is a sea cobra, a paddle-tailed snake which attains a length of 10 feet.

Became Great Musician

George Riddell Was A Shepherd And Never Had A Teacher

One scarcely expects a high order of musical ability among the ranks of shepherds—but did not Scotland produce great poets who were connected with the farm—Robert Burns and William Hogg?—yet tribute has just been paid to a humble Aberdeenshire shepherd in the person of George Riddell, on his 85th birthday.

George Riddell never had a teacher; never learned a note of music except by picking it up when he lay in the fields as a lad and traced printed notes by the sounds he knew they represented. One of the greatest violinists Scotland has known for generations, he has composed an enormous amount of music which will take its place among the finest native compositions. The late Sir William Boulton, chairman of an Edinburgh musical organization, said he would be happy if he could claim the authorship of Mr. Riddell's song, "The Tarrin' o' the Yoll." "How I admire your genius," he wrote the composer on his death, "and I am sure that you will be remembered for generations to come."

Message From Chief Scout

Service Is Recipe For Happy Life Says Lord Baden-Powell

The national office of the Boy Scouts of America, 2 Park Avenue, New York, made public a message it had received from Lord Baden-Powell, founder of the Boy Scout movement, who recently celebrated his 80th birthday.

Lord Baden-Powell, who is the "Chief Scout of the world," told the more than 2,000,000 Scouts in the world of the active life he has led, of the happiness he has obtained from being of service to others, and added:

"Eighty years may seem to you a long life but I can't remember a time when I wasn't busy, and as long as you are busy you can't help being cheerful. If ever you find yourself without something to do, remember there are always lots of people wanting help, old people or infirm and poor people, who would be only too glad of a helping hand."

"However poor or small you may be, you can always find some one worse off than yourself, ill or old or crippled. If you go and help them and cheer them up a funny thing happens. You find that by making others happy you are making yourself all the happier, too."

"I want you to have as long and jolly a life as I have had. You can get it if you keep yourself healthy and helpful to others. I will tell you my secret for this:

"I have been promised and the Scout law is that I will do my best. If you do that, you will make a success of your life and will have a very happy time, even if you live to 80."

Neglecting Valuable Food

Average Canadian Family Does Not Eat Much Fish

Premier A. L. Macdonald of Nova Scotia writes:

It has been proven conclusively that sea foods properly prepared, have unusual health-giving power. Fish is easily digested, they help the human body to resist disease and they promote the growth of children. They possess a great deal more protein than either chicken or beef and provide the best balanced diet for available. As to cost—they are relatively inexpensive.

Nevertheless it is said that the average Canadian family is content with perhaps one meal of fish a week. Leading dietitians deplore this apparent lack of interest in the intrinsic value of fish foods. We heartily welcome the present campaign to encourage the consumption of fish inaugurated by Hon. J. E. Michael, Minister of Fisheries at Ottawa.

Deep sea fishing is a hazardous calling. Our Canadian fishermen imperil their lives day after day to make available a constant supply of wholesome and delicious sea foods. These hardy and courageous men are the backbone of our food supply. For their sake, for your own sake, for the sake of your family, patronize their products. Serve more sea fish and remember that every day may be fish day.

St.

SORE THROAT?

Quick!

Gargle with "ASPIRIN"

For the most amazing relief from sore throat due to colds, do this: Crush and dissolve three "Aspirin" tablets in ½ glass of water. Then gargle with this, holding the head well back. This puts the soothing anesthetic medicine of "Aspirin" in direct contact with the sore, inflamed membranes of your throat. Thus rawness and pain are eased almost instantly and you have wonderful comfort. You'll say it's the most marvelous way to relieve a sore throat you ever found. And your doctor, you are sure, will approve it. "Aspirin" tablets are made in Canada by the Bayer Company, Limited, of Windsor, Ontario.

ASPIRIN

THE YELLOW BRIAR

A Story of the Irish on the Canadian Countryside

By PATRICK SLATER

By arrangement with Thomas Allen, Publisher, Toronto.

CHAPTER I.

Out in the Ontario countryside, the late spring is a pleasant and soul-melting season of the year. It commences once the seeding is done; and lasts until the chattering mower starts to misanthropic its pitman shaft. In those sweet-smelling, warm, soft, juicy days of early June, the fields everywhere are bursting with fresh young life. After the dry fodder of a long winter, the cattle have had time to purge their bowels with the rich, lush grasses; and their skins have been softened, and the dirty warbles on their flanks have been loosened by the warm spring rains. The air is so soaked with delicious hope as the meadows with the dew. It is for such an inviting scene that the silent and wary thoroughbred of the South; and it is the rapture of it filling his breast that turns him into the saucy and intimately friendly robin who insists on nesting in the most obvious places about my kitchen stoop. Plain for me to understand, he tells me the time is now at hand to "Cheer up! Dye hear? Let joy be unconfeined."

Perhaps you think the mellow tones of the late autumn should make a stronger appeal to an old fellow like me. Faith no! Sure an Irish like is always youthful. Before we grow old, we live in hope of things here: when we are grown old, we are in hope of things here. The weight of years that burden the flesh presses lightly on the spirit of an old Irishman. In this northern clime, harvest time has always seemed to me a serene and gloomy season. I have seldom seen men come rejoicing, bringing in the sheaves—and never in a barley harvest. The nights commence settling down early, and come upon us with an abrupt suddenness. The air bites a bit in the early mornings, and here and there, the future time marks the midnight provings of the frost king, who already plans to reassert his sovereign rights. If the crops have been poor, the scanty contents of the barns distress us; and if Nature has been over bountiful, the prices offered are more distressing still. The farmer's is a gambler's job. Old Mother Earth rolls the bones for him. In the spring, he has laid his wagers, and his hope hangs high. It is pleasant to watch the young gambler on the hillside pastures and punch the swollen udders of their dams. It is sweet to smell the pungent, homely earth in its creative

HE DARE NOT MOVE IN BED

Nights Were Torture Through Lumbago

Only those who have suffered from lumbago know how exceedingly painful it can be. And when they discover a remedy for this complaint, they are anxious to pass on the good news to other sufferers. Let this man tell you how Kruschen brought him relief.

"I had a bad attack of lumbago. When I got into bed I had to stay in that position—I could not move for pain. I didn't know what to take or what to do. I was advised to try Kruschen Salts and I am very grateful I did so. After taking a few doses I felt relief, and after taking one large bottle, I am glad to say that my lumbago had entirely gone, and I have not had the slightest trace of it coming back."—G.A.V.

Kruschen is a combination of numerous mineral salts which assist in stimulating your liver and kidneys to healthy, regular activity. They ensure internal cleanliness and help to keep the bloodstream pure.

offhand, how old they are—unless they are over forty.

"Are you Mr. Patrick Slater?" he enquired; and her voice was low and pleading.

I dislike a woman who uses her nose as a sounding board.

"Yes," I said. "I am old Paddy Slater."

Then I found myself chatting with a very lovely young girl whose blue-grey eyes were soft and friendly. She stood as straight as a whip; and she looked me square in the face. I had seen those eyes many a time before. Her mouth was pleasant and sweet. Her clothes every day would be the same as Sunday, with the neatness of the pretty girl—so comely and engaging.

I do not mention her name; because, as they say in the army: "No names, no pack drill." My young friend may happen to read this, and she might not like it.

(To Be Continued)

Amazing New Store

Is Named Keedoolee And Sells Groceries By Electricity

Dynamic Clarence Saunders has announced he is ready to try for a third fortune with an amazing new Keedoolee grocery store in Memphis, Tenn., in which electricity delivers the customers' purchases and adds up the cost.

He plans to open one Keedoolee store, he said, adding there as needed. The name, Keedoolee, doesn't mean anything particularly.

The customer enters and obtains a key—a fibre rod about seven inches long with a red light at the end. I had seen those eyes many a time before. Her mouth was pleasant and sweet. Her clothes every day would be the same as Sunday, with the neatness of the pretty girl—so comely and engaging.

Another Ape-Man

Skull Of Prehistoric Ape-Man Found In South Africa

The skull of another prehistoric ape-man, believed to be between 50,000 and 100,000 years old, has been discovered by Mr. G. Barlow in the Sterkfontein Caves, five miles from Krugersdorp, in the Transvaal.

Mr. Barlow was blasting near the entrance to the caves at the spot where Dr. Robert Broom, of the Transvaal Museum, found the skull of a prehistoric woman, a near relation of the Taung's ape, which he christened "Transvaalensis."

Embedded in the red Bushmen's limestone, Mr. Barlow found the skull, which is likely to be of great importance to anthropologists.

While the woman's skull had only three teeth, this new discovery has a complete set, both upper and lower teeth.

The Transvaalensis man probably walked half-upright. They were non-forest-antropoids. Something more than monkeys but less than men, they did not climb trees, but made caves their homes.

According to Dr. Broom, it is not improbable that the first man evolved from this group of manlike apes. Thus Africa may be proved to be the cradle of the human race.

The Transvaalensis man lived in the Pleistocene Age, thousands of years ago, when dinosaurs and giant elephants roamed Africa. Probably these early men ate elephants.

Possibly they left the primeval forests to hunt for food with sticks and stones, and look about in caves when danger threatened.

Cost Would Be Prohibitive

Erection Of New Crystal Palace In London Unlikely

Is there to be a second Crystal Palace on the site of the old? It is highly unlikely that even if another house of entertainment should arise it will take the form of the former huge house of glass. The cost, for one thing, would be prohibitive.

The old Crystal Palace, moreover, is believed to have been a fine landmark for hostile aircraft during the war, much in the same way as the Thames proved another excellent guide for enemy airmen. In spite of this the Palace became "M.S. Crystal Palace" during the war when it was used for the training of the Royal Naval Division. Probably the government will be asked to give its aid to the building of a new palace, and its attitude towards such a scheme would obviously be influenced by consideration of national safety.

The Crystal Palace, which was a reconstruction of the building built for the Great Exhibition of 1851 in Hyde Park, cost \$7,500,000.

Knits To Soothe Nerves

English Judge Finds It Effective After Trying Day

Do men or women make the best knitters?

This question was discussed during the hearing of a high court case in London.

Justice Sir George Hilbery asked H. B. Samuels, King's Counsel, why he thought skillful knitting was confined to women. "Because in my experience it is," replied counsel.

"I happen to know some one who is a very great lawyer and a very skillful knitter," the judge pointed out. Samuels agreed that a man might knit well, and added that he had met a man recently who was a skillful worker at very fine tapestry.

The judge was referring to Justice Sir Arthur Luxmoore, who finds that knitting socks is a pleasant sedative after a hard day with a knotty legal problem in the Chancery Division. He was first discovered at this hobby, at which he is proficient, by a friend who had called to take tea with him.

A "pygmy" orchid, from Panama, a yellow, brown-flecked bloom about the size of a dime and the only known specimen of its kind, was on display at the annual exhibition of the Shaw's Garden Orchid Collection in St. Louis, Missouri, one of the finest in the world.

John Hancock's signature on the Declaration of Independence was so large that his name has been synonymous with signatures ever since.

Germany and Italy To Stay Away From Geneva Conferences

Italy will not attend the League of Nations committee meeting on raw materials supplies nor any other conference organized by the league; a semi-official announcement said.

Germany has also announced it will not attend.

The submarine is regarded as a modern invention. The first one was really built in England in 1820. It was a wooden shell, covered with leather, and navigated by 12 rowers.

Movie studios are able to save \$120,000 annually by recovering silver from the film-slipping bath.

ROYAL HOUSEHOLD FLOUR

NAME the PICTURE CONTEST

\$330.00 IN CASH PRIZES

3 Big Contests—259 Cash Prizes

First Prize \$100.00
Second Prize 25.00
Third Prize 15.00

5 Prizes of \$5.00 each \$25.00
75 Prizes of \$2.50 each \$187.50
GRAND PRIZE \$250.00

Follow these simple rules:

1 Write your title on the coupon (name and address and that of your dealer).

2 With each title send the words "Royal Household" cut from the small leader in every bag of Royal Household Flour, or a reasonably accurate facsimile of same.

3 You may send as many different titles as you wish, but each must be accompanied by a picture of the leader as outlined in Rule 2.

4 This contest will close April 14, 1937. All entries must be postmarked not later than that date.

WATCH FOR CONTEST "C" RETAILERS: You share in this, too. Each dealer named by the first three prize winners, and the winner of the Grand Prize, will receive \$35.00.

CONTEST CLOSES APRIL 24

Stenographic Errors

Employers Able Sometimes To See Humor In Them

Of course, the boss never makes a mistake! But he always gets a smile from stenographic and typing slips made by even the best of secretaries. Complaining of the "howlers," there is the one made by a White House stenographer who apparently wasn't familiar with the term "faux pas." But a vigilant eye detected this fact before the letter went out with "forepas." And it was a farm girl who became a city stenographer that wrote "yolk of oxen."

A literary man was surprised to find in a manuscript which had just been typed a reference to Gunga Doone. There was nothing, however, about Lorna Din.

Perhaps there is something in the philosophy of a newspaper columnist's response to a stenographer who had typed a reference to Gunga Doone. There was nothing, however, about Lorna Din.

What do you advise me to study to improve myself?"

"Stenography," was the reply—Christian Science Monitor.

Little Theatre Movement

Has Passed Amateur Class In Canada

The appellation "amateur" should not be used too freely in describing the dramatic work now being done by the Little Theatre movement in Canada, in the opinion of George de Warfaz, London, England, critic.

The movement should now consider itself out of the purely "amateur" class, declared Mr. de Warfaz in an interview at London, Ontario. For that reason he was severe in criticism, as the players must be judged according to the high standards and traditions of the stage.

The Little Theatre movement in Canada is stronger and more vigorous than that in England, he said, and has financial support it lacks in the Old Country.

Likes Silly Symphonies

Queen Mary Always Enjoys Comedy Film At Movies

Queen Mary has her film preferences. They were indicated recently at the premiere of "The Great Barrier," at which the Queen was present. Let it be said at once they include the "silly symphonies." And so when the program was being arranged for the first showing of the picture based on the story of the building of the Canadian Pacific Railway, an honored place was reserved for a Walt Disney farmyard adventure, with the distressed hen, the amiable chicks, the embarrassed dog, at all the antics of which Her Majesty expressed her undisguised delight.

Will Not Attend Meetings

Little Helps For This Week

Why art thou cast down O my soul, and why art thou disquieted within me? Hope thou in God, for I shall yet praise Him, who is the health of my countenance, and my God. Psalm 42:2.

Why by passing clouds oppressed, Should vexing thoughts distract thy breast? Turn thou to Him in every pain, Whom never suppliant sought in vain.

Thy strength in joy's ecstatic day, Thy hope when joy has passed away.

Beware of letting your care degenerate into anxiety and unrest, tossed as you may be amid the waves and winds of sundry troubles, but keep your eyes fixed on the Lord and say "My God I look to Thee alone; be Thou my guide and pilot," and then be comforted. When the shore is gained who will heed the toll and the storm. We shall steer safely through as long as our heart is right and our course steadfast, and our trust is placed in God. All the storms we have to encounter are but opportunities for us to strengthen ourselves in the loving graces which our Lord bestows before us.

Pigeons Are Happy

The Christian Science Monitor says San Francisco pigeons, could they be quoted, would be among these happiest over the end of the 98-day maritime strike. Sea gulls had begun to "muscle in" on pigeon territory at Civic Center Plaza, Union Square, and even on downtown streets as pickings became scarce with ship traffic at a standstill.

Some people cannot be accused of being quitters. They never get started.

ITCHING

TORTURE STOPPED IN A Minute!

For relief from the itching of eczema, urticaria, sunburn, and other skin eruptions, apply PRESTO-PACK. The gentle oil soothes the irritated skin. Clear, granular, and non-staining. A little trial bottle, 4¢. For more, press 10¢ or money back. Ask for D.D.D. Prescription.

of GUST HALBERG, late of the
Town of Lacombe, in the Province
of Alberta, Shoemaker, deceased.

NOTICE IS HEREBY GIVEN that
all persons having claims upon the
Estate of the above named Gust Hal-
berg, who died on or about the 12th
day of January, A.D. 1937, are re-
quired to file with J. H. Thom,
Public Administrator, Court House,
Edmonton, Alberta, Administrator of
the Estate of the said deceased, by
the 20th day of May, A.D. 1937, a
full statement of their claims, with
claims and of any securities held by
them, and that after that date the
Administrator will proceed to dis-
tribute the assets of the deceased
among the parties entitled thereto,
having regard only to the claims of
which notice has been so filed or
which have been brought to his
knowledge.
DATED this 22nd day of April,
A.D. 1937.

TENDERS FOR COAL
Sealed Tenders addressed to the
undersigned and endorsed "Tender
for Coal for Western Provinces,"
will be received until 12 o'clock
noon (daylight saving), Friday, May
14, 1937, for the supply of coal for
the Dominion Buildings and Experi-
mental Farms and Stations, through-
out the Province of Manitoba, Sas-
katchewan, Alberta and British Co-
lumbia.

Forms of tender with specifica-
tions and conditions attached can
be obtained from the Purchasing
Agent, Department of Public Works,
Ottawa; the District Resident Archi-
tect, Winnipeg, Man.; the District
Resident Architect, Regina, Sask.;
the District Resident Architect, Cal-
gary, Alta.; and the District Resi-
dent Architect, Victoria, B.C.

Tenders should be made on the
forms supplied by the Department
and in accordance with departmen-
tal specifications and conditions
attached thereto.

In the case of tenderers quoting
for one or more places or buildings
and when the total of their offer
exceeds the sum of \$5,000.00, they
must attach to their tender a cer-
tified cheque on a chartered bank in
Canada, made payable to the order
of the Honourable the Minister of
Public Works, equal to 10 per cent
of the amount of the tender, or Bear-
er Bonds of the Dominion of Canada
or of the Canadian National Rail-
way Company and its constituent
companies, unconditionally guaran-
teed as to principal and interest by
the Dominion of Canada, or the
aforementioned bonds and a cer-
tified cheque if required to make up
an odd amount.

The Department also reserves the
right to demand from any successful
tenderer a security deposit in the
form of a certified cheque or bond
as above, equal to 10 per cent of the
amount of his bid, to guarantee the
proper fulfilment of the contract.
By order.

J. M. SOMERVILLE,
Secretary.
Department of Public Works,
Ottawa, April 16, 1937. a22p

CARD OF THANKS
We wish at this time to thank the
many friends and neighbors for
their expressions of comfort and
sympathy, also for floral tributes in
the loss of our dear wife and mother.
—J. Laing and Family. a22p

The longest railway platform in
England is to be found in Manches-
ter. It is at the Victoria and Ex-
change station, 2194 feet in length.

Fred Marquardt Has
Hand Made Violin

A truly marvelous piece of crafts-
manship has been finished by Fred
Marquardt, who lives 12 miles north-
west of town. Mr. Marquardt has
just completed a violin, entirely
hand made with the exception of the
pins, strings, the fingerboard and
the tail piece.

Cedar, maple, walnut, white hem-
lock and birch were the woods used.
A design has been made on the top
of the violin, where walnut and
white hemlock are inlaid.

Mr. Marquardt, who made the in-
strument in less than 12 days, mod-
elled his handwork from a Stradi-
varius and a Steiner.

The violin has a beautiful mellow
and full tone, and Mr. Marquardt,
who participated in the Old-Time
Fiddlers' Contest last fall, intends to
use the same contest this year
with his new "fiddle."

Well Known Rimbey
Farmer Passes On

RIMBEY—George Henry Edward
Williams, 60, a well-known farmer,
who has lived in this district for
more than 20 years, died of pneu-
monia at his home, seven miles west
of Rimbey, on the evening of April
19th. The late Mr. Williams was
born in England and was a veteran
of the Boer War.

He is survived by his widow; one
son, Norton, of Rimbey; and three
married daughters, Mrs. G. Nelson
of Rimbey, Mrs. S. Freeman of the
Bentley district, and Mrs. O'Connell
of Slocan City, B.C. Two
brothers, William and Bert, farm
west of Rimbey; a brother Dick and
a sister, Mrs. Winnie Taylor, reside
at Viking, and a second sister, Lil-
lian Williams, in New York State.

Funeral services will be held in
the Church of the Epiphany at Rim-
bey on Rev. W. E. Herbert of La-
combe will conduct the service.

FREE SHOWS WELL ATTENDED
The free shows given in the Avo-
n Theatre Wednesday afternoon
and evening were well attended. The
entertainment, presented by General
Motors of Canada Ltd., and spon-
sored locally by Laird Motors, con-
sisted of entertaining and instruc-
tive facts.

Buy Baby Chicks
in Next Few Weeks

To obtain birds that will give the
maximum of egg production next
Autumn and also to have broilers
when prices are high, farmers would
be well advised to buy their chicks
within the next few weeks, accord-
ing to the latest of the Poultry Ser-
vices, Dominion Department of Agri-
culture.

The sale of chicks is reported as
good in the Maritime provinces, fair
in Ontario and Quebec and good in
all the four Western provinces. It
is evident that the demand is in-
creasing for baby chicks with a good
record of breeding behind them and
from flocks that have had blood
tested and approved. At the present
time, 95 per cent of the ap-
proved hatcheries in Canada use
only eggs from blood-tested flocks
and with a good production record
behind them. These hatcheries sell
around 13,000,000 chicks a year, the
price of which ranges from 10 to 15
cents per chick.

So minute is the fern spore that
it is scarcely visible. Although the
plant sends off millions of these
spores, comparatively few survive.

STYLE SHOW IS
WELL ATTENDED

Mrs. M. C. Ballingal of the Wabas-
co Cotton Co. demonstrated the vari-
ous uses of cotton materials last
Thursday and Friday afternoons at
the Style Show sponsored by A. M.
Campbell Limited. The store was
crowded to capacity.

Models displayed practical and
beautiful garments for tiny tots to
elaborate evening gowns for the
younger set and matrons.

A wedding gown of white voile
and bridesmaids' and flower girls'
gowns of blue voile were very effec-
tive.

All dresses modelled were fash-
ioned from prints, percales, broad-
cloths and voiles and are available
at A. M. Campbell's store.

Models were displayed by Mrs. L.
Calkins, Misses Margaret Masters,
Gladys Rhind, Jean Henderson, Mary
McConnell, Isabel Frizzell, Shirley
Love, Marjorie Frizzell and Jackie
Wilks.

Valuable prizes were given each
afternoon. The lucky ladies who
won print material and bed linen
sets were: Mrs. L. Young, Mrs. C. R.
Hensbury, Miss Margaret Frizzell,
Miss G. Leach, Mrs. Neil McFarlane
and Mrs. T. Lett.

DEPRESSION
"Those sausages you sent me were
meat at one end and bread at the
other."

"Yes, ma'am. In these hard times
it's difficult to make both ends
meet."

EXPLANATION
A poet mailed an effusion entitled
"Why Do I Live?" to a literary re-
view.

The editor returned the poem with
the following note, "You live be-
cause you didn't dare bring it in
yourself."

Do not overlook the fact that
Lacombe Furniture Store carries a
stock of Wallpaper equal to most
cities—Advt.

Clive

CLIVE—W. R. Johnson under-
went an operation for appendicitis
in the Lacombe Hospital on Friday
last and is reported doing well.

D. W. Wilson and family motored
to Ponoka on Sunday to visit Mrs.
Wilson's mother, Mrs. Morrison, and
sister, Mrs. H. Northcott.

The G.G.T. Group met at the
home of Mrs. E. W. Grosse on Mon-
day evening.

Gold Miner Visits
Milton Drake visited friends at
Clive last week. Mr. Drake has
been washing gold on the Macleod
River. He expects to work on the
North Saskatchewan this summer
and says he could put a thousand
men to work so they could make a
good living.

John Morton returned home last
week from Winfield, where he has
been working at a sawmill.

S.S. Lusitania was sunk by the
German submarine U-39 in 1915.
